**(54) CROSSLINKED FOAM**

(57) Abstract:

**PURPOSE:** A crosslinked foam having a high expansion ratio and being excellent in hardness, tear strength, impact resistance and elasticity, prepared by adding a crosslinking agent and a blowing agent to a mixture of 1,2-polybutadiene, natural or synthetic rubber and a specified polymer.

**CONSTITUTION:** A crosslinked foam prepared by adding a crosslinking agent and a blowing agent to a mixture of (A) 30W95wt% 1,2-polybutadiene of a 1,2-bond content  $\geq 70\%$ , a crystallinity  $\geq 5\%$  and an intrinsic viscosity  $[\eta]$  (as measured in toluene at  $30^\circ\text{C}$ )  $\geq 0.5\text{dl/g}$ , (B) 5W50wt% at least one rubber selected from among natural rubber, diene synthetic rubbers and noniene rubbers and (C) 1W19wt% at least one member selected from among polyethylene polymers,

ethylene/vinyl acetate copolymer  
resins, polystyrene resins, ionomer  
resins, polybutene-1, polyester  
elastomers, polyurethane elastomers  
and polypropylene polymers.
